

MIGE2210

10-port Din-Rail Layer 2 Unmanaged Industrial Ethernet Switch

Product description

MIGE2210 is a high-performance unmanaged industrial Ethernet switch with 2 Gigabit ports and 8 100M ports which support 10/100M auto-sensing, it is suitable for applications with large bandwidth requirements. This product has a power failure alarm output function, which is convenient for field engineers to find and handle faults in time. The standard 35mm pitch DIN rail mounting method is ideal for industrial field installation applications. MIGE2210 can be operated at wide temperatures range from -40 to 85°C, and its IP40 casing house satisfies any harsh industrial environment.

Features:

- 2 Gigabit ports + 8 100M ports (Port configuration see Ordering Information in last page)
- Support 10Base-T/100Base-TX/1000Base-T adaptive port (full/half duplex), automatic MDI/MDI-X connection
- Industrial grade power supply with anti-reverse/overcurrent/overvoltage/EMC protection
- Compact IP40 rated casing house with fanless design
- Support power-down status reply alarm output
- Support status display indicator lights
- Support storm suppression function
- Support MAC address fast learning and aging
- Wide temperature range from -40 to 85°C
